ViewWindows.First

Property **First** As ViewWindow

Description

Member of ViewWindows

The **First** property returns the first view.

The **First** property returns a read-only value.

Copyright 2014 Corel Corporation. All rights reserved.

ViewWindows.Item

Property **Item**(Index As Long) As ViewWindow

Description

Member of ViewWindows

The **Item** property returns a view by index.

The **Item** property returns a read-only value.

Copyright 2014 Corel Corporation. All rights reserved.

ViewWindows.Last

Property **Last** As ViewWindow

Description

Member of ViewWindows

The **Last** property returns the last view.

The **Last** property returns a read-only value.

Copyright 2014 Corel Corporation. All rights reserved.

Window

Properties Methods

Description

The **Window** class represents a document window.

Copyright 2014 Corel Corporation. All rights reserved.

Window.Activate

Sub **Activate()**

Description

Member of Window

The **Activate** method opens a window (if it is not currently open) and makes it the active window.

Some operating systems do not allow the application to activate itself, to prevent intervention with the current activity. If the application cannot be activated, the application window flashes on the taskbar, but it does not appear in the foreground.

VBA example

The following VBA example sets the last window in the collection as the foreground window.

```
Sub Test()
 Dim Wnd As Window
 Set Wnd = ActiveDocument.Windows(ActiveDocument.Windows.Count)
 Wnd.Activate
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Active

Property **Active** As Boolean

Description

Member of Window

The **Active** property returns whether a window is active (that is, currently in use). If the window is active, a value of **True** is returned.

The **Active** property returns a read-only value.

VBA example

The following VBA example displays the caption for the active window.

```
Sub Test()
 Dim Wnd As Window
 For Each Wnd In ActiveDocument.Windows
  If Wnd.Active = 1 Then
   MsgBox Wnd.Caption & " is the active window."
  End If
 Next Wnd
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.ActiveView

Property **ActiveView** As ActiveView

Description

Member of Window

The **ActiveView** property returns reference to the active view.

The **ActiveView** property returns a read-only value.

VBA example

The following VBA example zooms the view to display all shapes in the document.

```
Sub Test()
 Dim actvw As ActiveView
 Set actvw = ActiveWindow.ActiveView
 actvw.ToFitAllObjects
 Set actvw = Nothing
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Application

Property **Application** As Object

Description

Member of Window

The Application object defines properties of the main CorelDRAW application. It is the top-level object in the CorelDRAW hierarchy of objects, and you can access all other features of the application through its functions, methods, and properties.

It is not necessary to explicitly specify an **Application** object; it is always available in VBA, and its properties and methods are global.

The **Application** property returns a read-only value that is associated with the main CorelDRAW application.

Copyright 2014 Corel Corporation. All rights reserved.

Window.Caption

Property **Caption** As String

Description

Member of Window

The **Caption** property returns the caption for a window.

The **Caption** property returns a read-only value.

VBA example

The following VBA example displays the caption for the active window.

```
Sub Test()
 MsgBox "The caption of the current window is: " & ActiveWindow.Caption
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Close

Sub **Close()**

Description

Member of Window

The **Close** method closes a window.

- When you close an active file, you are pompted to save it.

VBA example

The following VBA example closes the first window in the Windows collection if it contains more than one window.

```
Sub Test()
 Dim Wnd As Window
 If ActiveDocument.Windows.Count > 1 Then
  Set Wnd = ActiveDocument.Windows(1)
  Wnd.Close
 End If
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Document

Property **Document** As Document

Description

Member of Window

The **Document** property returns a read-only reference to the document to which a window belongs.

VBA example

The following VBA example displays the title of the document.

```
Sub Test()
 Dim CDoc As Document
 Set CDoc = ActiveWindow.Document
 MsgBox "The title of this document is: " & CDoc.Title
 Set CDoc = Nothing
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.DocumentToScreen

Sub **DocumentToScreen(***XDoc As Double*, *YDoc As Double*, *XScreen As Long*, *YScreen As Long***)**

Description

Member of Window

The **DocumentToScreen** method converts document coordinates to screen coordinates.

Parameter	Description
XDoc	Specifies the x-coordinate in the document
YDoc	Specifies the y-coordinate in the document
XScreen	Specifies the x-coordinate on the screen
YScreen	Specifies the y-coordinate on the screen

VBA example

The following VBA example converts the specified document coordinates to screen coordinates.

```
Sub Test()
 Dim x As Long
 Dim y As Long
 ActiveWindow.DocumentToScreen 4.25, 5.5, x, y
 MsgBox "The document coordinates (4.25,5.5) converted to screen " & _
  "coordinates are (" & x & "," & y & ")."
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.FullScreen

Property **FullScreen** As Boolean

Description

Member of Window

The **FullScreen** property returns or specifies whether the active window is visible at full-screen size. If the property is set to **True**, the active window fills up the full screen. If the value is **False**, the active window is viewed in the normal application window.

VBA example

The following VBA example enables full-screen preview mode.

```
Sub Test()
 ActiveWindow.FullScreen = True
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Handle

Property **Handle** As Long

Description

Member of Window

The **Handle** property returns the window handle for a document window.

The **Handle** property returns a read-only value.

VBA example

The following VBA example displays the window handle for the active window.

```
Sub Test()
 MsgBox "The window handle is: " & ActiveWindow.Handle & "."
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Height

Property **Height** As Long

Description

Member of Window

The **Height** property returns or specifies the height of a window. This value is measured in screen pixels.

VBA example

The following VBA example displays the height of the active window.

```
Sub Test()
 MsgBox "The height of the active window is: " & ActiveWindow.Height
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Index

Property **Index** As Long

Description

Member of Window

The **Index** property returns the index number of a window in a Windows collection.

The **Index** property returns a read-only value.

VBA example

The following VBA example displays the caption for each window in the **Windows** collection of the active document.

```
Sub Test()
 Dim Wnd As Window
 Dim s As String
 For Each Wnd In ActiveDocument.Windows
  s = s & Wnd.Index & " - " & Wnd.Caption & vbCr
 Next Wnd
 MsgBox "The current document contains the following windows: " & vbCr & s
 Set Wnd = Nothing
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Left

Property **Left** As Long

Description

Member of Window

The **Left** property returns or specifies the left coordinate of a window. This value is measured in screen pixels.

VBA example

The following VBA example displays the left coordinate of the active window.

```
Sub Test()
 MsgBox "The left coordinate of this window is: " & ActiveWindow.Left
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.NewWindow

Function **NewWindow()** As Window

Description

Member of Window

The **NewWindow** method creates a new window and returns a reference to the newly-created window.

VBA example

The following VBA example creates a new window.

```
Sub Test()
 ActiveWindow.NewWindow
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Next

Property **Next** As Window

Description

Member of Window

The **Next** method returns a read-only reference to the next window in a Windows collection.

VBA example

The following VBA example displays the caption of the active window and then displays the caption of the next window in the collection.

```
Sub Test()
 Dim Wnd As Window
 Set Wnd = ActiveDocument.Windows(1)
 MsgBox "The current window is: " & Wnd.Caption
 Set Wnd = Wnd.Next
 MsgBox "The next window is: " & Wnd.Caption
 Set Wnd = Nothing
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Page

Property **Page** As Object

Description

Member of Window

The **Page** property returns a read-only reference to the active page of a window.

VBA example

The following VBA example displays the name of the current page in the active window.

```
Sub Test()
 MsgBox "The name of the current window's page is: " & ActiveWindow.Page.Name
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Parent

Property **Parent** As Windows

Description

Member of Window

The **Parent** property returns a read-only value that is associated with the properties, methods, and controls of an object's parent in the CorelDRAW hierarchy of objects. The application object refers to the CorelDRAW application.

A parent object acts as a container for child objects. For example, a form (as a container) is the parent object of a check box on that form.

Most objects have either a **Parent** property or a **Collection** property, pointing to the object's parent object in the object model. The **Collection** property is used if the parent object is a collection.

Copyright 2014 Corel Corporation. All rights reserved.

Window.Previous

Property **Previous** As Window

Description

Member of Window

The **Previous** method returns a read-only reference to the previous window in a Windows collection.

VBA example

The following VBA example displays the caption of the current window and then displays the caption of the preceding window in the **Windows** collection.

```
Sub Test()
 MsgBox "The current window is: " & ActiveDocument.ActiveWindow.Caption
 MsgBox "The previous window is: " & ActiveDocument.ActiveWindow.Previous.Caption
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Refresh

Sub **Refresh()**

Description

Member of Window

The **Refresh** method redraws a window, updating it with the most recent information.

VBA example

The following VBA example refreshes all windows in the Windows collection of the active document.

```
Sub Test()
 Dim Wnd As Window
 For Each Wnd In ActiveDocument.Windows
  Wnd.Refresh
 Next Wnd
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.ScreenToDocument

Sub **ScreenToDocument(***XScreen As Long*, *YScreen As Long*, *XDoc As Double*, *YDoc As Double***)**

Description

Member of Window

The **ScreenToDocument** property converts screen coordinates to document coordinates.

Parameter	Description
XScreen	Specifies the x-coordinate on the screen
YScreen	Specifies the y-coordinate on the screen
XDoc	Specifies the x-coordinate in the document
YDoc	Specifies the y-coordinate in the document

VBA example

The following VBA example converts the specified screen coordinates to document coordinates.

```
Sub Test()
 Dim x As Double
 Dim y As Double
 ActiveWindow.ScreenToDocument 515, 404, x, y
 MsgBox "The screen coordinates (515,404) converted to document " & _
  "coordinates is (" & x & "," & y & ")."
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.Top

Property **Top** As Long

Description

Member of Window

The **Top** property returns or specifies the top coordinate of a window. This value is measured in screen pixels.

VBA example

The following VBA example displays the current top coordinate, sets it to half of its original value, and displays the new value.

```
Sub Test()
 MsgBox "The current top coordinate is: " & ActiveWindow.Top
 ActiveWindow.Top = ActiveWindow.Top / 2
 MsgBox "The new top coordinate is: " & ActiveWindow.Top
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.ViewWindow

Property **ViewWindow** As ViewWindow

Description

Member of Window

The **ViewWindow** property returns the view window that hosts the document window.

Copyright 2014 Corel Corporation. All rights reserved.

Window.Width

Property **Width** As Long

Description

Member of Window

The **Width** property returns or specifies the width of a window. This value is measured in screen pixels.

VBA example

The following VBA example displays the width of the active window.

```
Sub Test()
 MsgBox "The width of the active window is: " & ActiveWindow.Width
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Window.WindowState

Property **WindowState** As cdrWindowState

Description

Member of Window

The **WindowState** property returns or specifies the state of a window. A window can be minimized or maximized, or it can be in a normal state. It can also be restored to its previous state.

The **WindowState** property returns a value of cdrWindowState.

VBA example

The following VBA example displays the active window's state, maximizes the window, and displays the new state.

```
Sub Test()
 MsgBox "The current window state is: " & ActiveWindow.WindowState
 ActiveWindow.WindowState = cdrWindowMaximized
 MsgBox "The current window state is: " & ActiveWindow.WindowState
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Windows

Properties Methods

Description

The **Windows** class represents a collection of document windows (or Window objects).

Copyright 2014 Corel Corporation. All rights reserved.

Windows.Application

Property **Application** As Object

Description

Member of Windows

The Application object defines properties of the main CorelDRAW application. It is the top-level object in the CorelDRAW hierarchy of objects, and you can access all other features of the application through its functions, methods, and properties.

It is not necessary to explicitly specify an **Application** object; it is always available in VBA, and its properties and methods are global.

The **Application** property returns a read-only value that is associated with the main CorelDRAW application.

Copyright 2014 Corel Corporation. All rights reserved.

Windows.Arrange

Sub **Arrange(**Style As cdrWindowArrangeStyle**)**

Description

Member of Windows

The **Arrange** method arranges all windows in a specified style. A window can be tiled horizontally or vertically, or it can be cascaded in the application window.

Parameter	Description
Style	Specifies the desired window arrangement. You must reference the style in which to organize the windows by passing the style type.

VBA example

The following VBA example arranges the application's windows vertically.

```
Sub Test()
 ActiveDocument.Windows.Arrange cdrTileVertically
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Windows.CloseAll

Sub **CloseAll()**

Description

Member of Windows

The **CloseAll** method closes all open windows in CorelDRAW.

- You are prompted to save your changes for each document that is “dirty” when you execute the **CloseAll** method.

VBA example

The following VBA example closes all windows in the application, prompting the user to save the document if “dirty.”

```
Sub Test()
 ActiveDocument.Windows.CloseAll
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Windows.Count

Property **Count** As Long

Description

Member of Windows

The **Count** property returns the number of windows in a Windows collection.

The **Count** property returns a read-only value.

VBA example

The following VBA example displays the number of windows in the **Windows** collection of the active document.

```
Sub Test()
 MsgBox "There are: " & ActiveDocument.Windows.Count & _
  " windows in the Windows collection."
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Windows.FindWindow

Function **FindWindow**(*Caption As String*) As Window

Description

Member of Windows

The **FindWindow** method finds a document window by its caption.

Parameter	Description
Caption	Specifies the caption

Copyright 2014 Corel Corporation. All rights reserved.

Windows.Item

Property **Item(***Index As Long***)** As Window

Description

Member of Windows

The **Item** property returns a read-only reference to a window in a Windows collection.

Item is the default property of the **Windows** class, and its reference can be omitted when you are accessing items in a **Windows** collection. For example, **Windows.Item(2)** is the same as **Windows(2)** — they both reference the second window in the collection.

Parameter	Description
Index	Specifies the window by its index number

VBA example

The following VBA example displays the caption of each window in the **Windows** collection.

```
Sub Test()
 Dim intCounter As Integer
 Dim Wnd As Window
 Dim s As String
  For intCounter = 1 To ActiveDocument.Windows.Count
   Set Wnd = ActiveDocument.Windows(intCounter)
   s = s & Wnd.Caption & vbCr
  Next intCounter
 MsgBox "The current document contains the following windows: " & vbCr & s
 Set Wnd = Nothing
End Sub
Sub Test()
 Dim Wnd As Window
 Dim s As String
  For Each Wnd In ActiveDocument.Windows
   s = s & Wnd.Caption & vbCr
  Next Wnd
 MsgBox "The current document contains the following windows: " & vbCr & s
 Set Wnd = Nothing
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Windows.Parent

Property **Parent** As Object

Description

Member of Windows

The **Parent** property returns a read-only value that is associated with the properties, methods, and controls of an object's parent in the CorelDRAW hierarchy of objects. The application object refers to the CorelDRAW application.

A parent object acts as a container for child objects. For example, a form (as a container) is the parent object of a check box on that form.

Most objects have either a **Parent** property or a **Collection** property, pointing to the object's parent object in the object model. The **Collection** property is used if the parent object is a collection.

Copyright 2014 Corel Corporation. All rights reserved.

Windows.Refresh

Sub **Refresh()**

Description

Member of Windows

The **Refresh** method refreshes all windows in a Windows collection, updating the windows with the most recent information.

VBA example

The following VBA example refreshes all windows.

```
Sub WindowsRefresh()
 ActiveDocument.Windows.Refresh
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspace

Properties Methods

Description

The **Workspace** class represents an application workspace, which is an enclosed work environment.

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Activate

Sub **Activate()**

Description

Member of Workspace

The **Activate** method makes a workspace the current one.

VBA example

The following VBA example sets the last workspace in the collection as the current workspace.

```
Sub Test()
 Workspaces.Item(Workspaces.Count).Activate
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Active

Property **Active** As Boolean

Description

Member of Workspace

The **Active** property returns whether a workspace is currently active in CorelDRAW.

The **Active** property returns a read-only value.

VBA example

The following VBA example displays a list of all workspaces and determines which one is active.

```
Sub Test()
Dim Ws As Workspace
 For Each Ws In Workspaces
  s = s & Ws.Name & " - Active: " & Ws.Active & vbCr
 Next Ws
 MsgBox "Workspaces: " & vbCr & s
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Application

Property **Application** As Object

Description

Member of Workspace

The Application object defines properties of the main CorelDRAW application. It is the top-level object in the CorelDRAW hierarchy of objects, and you can access all other features of the application through its functions, methods, and properties.

It is not necessary to explicitly specify an **Application** object; it is always available in VBA, and its properties and methods are global.

The **Application** property returns a read-only value that is associated with the main CorelDRAW application.

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Default

Property **Default** As Boolean

Description

Member of Workspace

The **Default** property returns whether the current workspace is the default workspace. If the default property is **True**, the current workspace is the default workspace.

The **Default** property returns a read-only value.

VBA example

The following VBA example displays a list of all workspaces and determines which one is the default workspace.

```
Sub Test()
 Dim Ws As Workspace
 For Each Ws In Workspaces
  s = s & Ws.Name & " - Default: " & Ws.Default & vbCr
 Next Ws
 MsgBox "Workspaces: " & vbCr & s
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Description

Property **Description** As String

Description

Member of Workspace

The **Description** property returns the description of a workspace.

The **Description** property returns a read-only value.

VBA example

The following VBA example displays a message box with the description of the current workspace.

```
Sub WorkspaceDescription()
 MsgBox "Description: " & ActiveWorkspace.Description
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Name

Property **Name** As String

Description

Member of Workspace

The **Name** property returns the name given to a workspace.

The **Name** property returns a read-only value.

VBA example

The following VBA example displays a message box with the name of the current workspace.

```
Sub WorkspaceName()
 MsgBox"Current Workspace: " & ActiveWorkspace.Name
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspace.Parent

Property **Parent** As Workspaces

Description

Member of Workspace

The **Parent** property returns a read-only value that is associated with the properties, methods, and controls of an object's parent in the CorelDRAW hierarchy of objects. The application object refers to the CorelDRAW application.

A parent object acts as a container for child objects. For example, a form (as a container) is the parent object of a check box on that form.

Most objects have either a **Parent** property or a **Collection property**, pointing to the object's parent object in the object model. The **Collection property** property is used if the parent object is a collection.

Copyright 2014 Corel Corporation. All rights reserved.

Workspaces

Properties

Description

The **Workspaces** class represents a collection of all available workspaces (or Workspace objects).

Copyright 2014 Corel Corporation. All rights reserved.

Workspaces.Application

Property **Application** As Object

Description

Member of Workspaces

The Application object defines properties of the main CorelDRAW application. It is the top-level object in the CorelDRAW hierarchy of objects, and you can access all other features of the application through its functions, methods, and properties.

It is not necessary to explicitly specify an **Application** object; it is always available in VBA, and its properties and methods are global.

The **Application** property returns a read-only value that is associated with the main CorelDRAW application.

Copyright 2014 Corel Corporation. All rights reserved.

Workspaces.Count

Property **Count** As Long

Description

Member of Workspaces

The **Count** property returns the number of workspaces in the Workspaces collection.

The **Count** property returns a read-only value.

VBA example

The following VBA example displays a message box with the number of workspaces in CorelDRAW.

```
Sub WorkspacesCount()
 MsgBox "There are " & Workspaces.Count & " workspaces in the collection."
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspaces.Item

Property **Item(***IndexOrName As Variant***)** As Workspace

Description

Member of Workspaces

The **Item** property returns a read-only reference to a workspace in the Workspaces collection. It is the default property of the **WorkSpaces** class.

Parameter	Description
IndexOrName	Specifies the workspace by its index number or name: • **Index** — Specifies the preset placeholder that uniquely identifies each member of the **Workspaces** collection • **Name** — Specifies the string that uniquely identifies each workspace

VBA example 1

The following VBA example displays a message box that lists the names of the workspaces.

```
Sub Test()
 Dim intCounter As Integer
 Dim Ws As Workspace
 Dim s As String
 For intCounter = 1 To Workspaces.Count
  Set Ws = Workspaces(intCounter)
  s = s & Ws.Name & vbCr
 Next intCounter
 MsgBox "The current document contains the following workspaces: " & vbCr & s
 Set Ws = Nothing
End Sub
```

VBA example 2

The following VBA example performs the same procedure as the previous example. However, instead of using a **For Next** command, it uses the **For Each** command in Visual Basic to iterate through all workspaces in the collection.

```
Sub Test()
 Dim Ws As Workspace
 Dim s As String
  For Each Ws In Workspaces
   s = s & Ws.Name & vbCr
  Next Ws
 MsgBox "The current document contains the following workspaces: " & vbCr & s
 Set Ws = Nothing
End Sub
```

Copyright 2014 Corel Corporation. All rights reserved.

Workspaces.Parent

Property **Parent** As Object

Description

Member of Workspaces

The **Parent** property returns a read-only value that is associated with the properties, methods, and controls of an object's parent in the CorelDRAW hierarchy of objects. The application object refers to the CorelDRAW application.

A parent object acts as a container for child objects. For example, a form (as a container) is the parent object of a check box on that form.

Most objects have either a **Parent** property or a **Collection** property, pointing to the object's parent object in the object model. The **Collection** property is used if the parent object is a collection.

PatternFill

Properties Methods

Description

The **PatternFill** class represents the settings for any of the three types of pattern fills: two-color bitmap (two-color) patterns, full-color bitmap (full-color) patterns, or vector patterns.

Copyright 2014 Corel Corporation. All rights reserved.

Properties

The PatternFill class contains the following properties:

- BackColor
- Canvas
- FilePath
- FrontColor
- MirrorFill
- MirrorFillX
- MirrorFillY
- OriginX
- OriginY
- RotationAngle
- SkewAngle
- TileHeight
- TileOffset
- TileOffsetType
